Caple Care

# Perfection By The Glass.

If you've invested a lot of time and money in your wine, you'll also want the perfect place to store it. As all wines react to their environment, a Caple wine cabinet is a must-have for anyone who wants to enjoy the full aroma and flavour of a good bottle.

We know how important a fine wine collection is, which is why our wine cabinets are specifically designed to keep it in perfect condition.

The kitchen is often at the heart of a good party. So choose a wine cabinet that's stylish, versatile and designed for the serious entertainer. Caple's wine cabinets cater for every kind of occasion, big or small.

They're packed with functionality and there's no better way of having perfectly chilled drinks to hand whenever you want them.

Our wine cabinets are also very flexible if you need space for cooling soft drinks or other cold refreshments. You can simply convert the interior by adding an optional frosted glass shelf, freeing up space in your fridge.

# Care For Your Collection.

## TO STORE

All wine should be stored at 12-14°C whether red or white. Our cabinets simulate cellar conditions - dark, still, humid and a constant temperature.

## TO SERVE

For rosés and whites it's 8-14°C, for sparkling wines it's 6-10°C. Full reds need 16-18°C, whereas lighter ones are best at 13-16°C.

For some wine cabinets this temperature variation is a problem. However, Caple cabinets can offer multiple zones that keep all your wines at the perfect temperature for storing or better still, serving.

## COMPRESSOR COOLING

When choosing a wine cabinet it's important to consider the type of cooling system it uses. Many conventional cabinets use thermo electric technology, which is only capable of cooling to 15°C below the room's ambient temperature.

So on a warm day of 25°C the contents will only cool to a minimum of 10°C, leaving your wine exposed to potentially damaging temperatures.

Caple's wine cabinets use a compressor cooling system, which maintains precisely the right temperature, regardless of the ambient room temperature.

## FINER WINE

Vibration and humidity during storage will influence how your wine will taste when it's finally poured. That's why Caple's wine cabinets come with anti-vibration gaskets and low vibration compressors to prevent disturbance to the wine's sediment balance. Our cabinets also create an ideal atmosphere of above 65% humidity, to preserve cork quality and prevent mould and odours. You can be confident your wine is in good hands.

## THE IMPORTANCE OF LIGHTING AND STACKING

Ultraviolet light causes lightstrike, which makes wine age prematurely. So it's important to avoid exposing bottles to sunlight or fluorescent light. Our white LEDs not only look great, they are also UV-free with no heat output either.

Bottles should usually be stored on their side so the wine stays in contact with the cork. This keeps the cork moist and ensures a good air seal for the bottle, which prevents oxidation and immediate ageing.

Wine benefits best from side storage if the level of the wine reaches at least the upper shoulder of the bottle when upright. Caple's wine cabinets provide sufficient shelves to allow for bottles to be stored either on a single level for easy reach, or stacked for longer storage.

# Get The Look.

Stylish on the outside, intelligent on the inside, our range of wine cabinets have everything you need for entertaining.

Choose from freestanding, in-column or undercounter models, which ever suits your needs best, and for greater flexibility some come with reversible doors.

Available in a variety of sizes with a choice of single or dual temperature zones, these cabinets are whisper quiet from just 37dB[A] - there's no chance of them ruining the party atmosphere.

The UV toughened glass keeps your wine protected from the sunlight. Surrounded by precision-crafted stainless steel, gunmetal or black glass, Caple wine cabinets will co-ordinate seamlessly with your kitchen style.

Our WC6100 wine cabinets have been designed to work with Sense or Sense Premium cooking range, so you can create your perfect combination.

# Sense Premium Wine Cabinets.

## SEAMLESSLY INTEGRATED

The Wi6161 & WC1800 Sense Premium wine cabinets are fully integrated to create a seamless aesthetic. Simply make a frame to match your kitchen furniture, to create a discreet and truly unique, luxurious style, with all of the premium functionality you can expect with a Caple wine cabinet.

## TELESCOPIC SHELVES

The beech and stainless steel fronted telescopic wire shelves are gentle on the bottles, reducing any accidental scratches on the label and allowing you to easily view your collection. Perfect for Burgundy, Bordeaux and Champagne bottles.

## AIR PURIFYING TECHNOLOGY

Charcoal filters eliminate odours and impurities in the air, preventing them from penetrating the cork, to ensure your collection is at its best when it comes to serving.

## PREMIUM FUNCTIONALITY

Four light settings and four functions means you can find the right storage environment to suit your wine.

### ON/OFF

Internal light is continuously on. Three minutes after closing the door the light will dim for a more subtle look.

### DOOR OPENING LIGHT

Internal light will switch on when the door is opened, and off when the door is closed.

### TIMER

This function keeps the lights on for 10 minutes once the door is closed and then switches off.

### BRIGHTNESS

Once a light function is selected you can adjust the brightness of the internal lighting.

### NORMAL MODE

The wine cabinet will operate with the temperatures you select.

### ECO MODE

Lighting and control panel turns off and the compressor is delayed. Perfect for saving energy.

### INTELLIGENT MODE

The fan speed adjusts according to the ambient temperature reducing noise levels and saving energy.

### DEMO MODE

Primarily for retail use. In this mode the compressor and heater are disabled and the fan input is reduced.

# Sense + Classic Wine Cabinets.

## FILLER PANELS + PLINTHS

If you have a reduced plinth you can use a filler panel made from the same material as the wine cabinet [stainless steel, black glass and gunmetal], to create a seamless look with no gap. A full plinth or recessed plinth grille option is available for our undercounter wine cabinets. They neatly cover the ventilation hole in the plinth and blend in with your kitchen décor.

## DUAL ZONE

Dual zone wine cabinets allow you to store your collection at the perfect temperature for storing and drinking.

## GLASS SHELVES

The glass shelves allows you to convert some of your wine cabinet into storage for canned drinks.

## CHAMPAGNE SHELVES

The easy-slide beech shelves are non-scratch so they won't damage bottle labels. If Champagne is your drink of choice, the slatted design allows you to store larger bottles so you're prepared for any special occasion.
